Related Categories: ColdFusion

Three of my functions have made it onto [CFLib.org](#). These probably aren't new to you if you've been following by blog, but since I don't think there is anyone watching me that close, check out [GetSecureURL\(\)](#), [IsColor\(\)](#), and [IsSQLServerDate\(\)](#) at CFLib.org. While you're there check out some of the many awesome functions that other people have submitted too.
