```
angular.module('Example', [])
  .controller('DirectiveController', [
    '$scope',
    function ($scope) {
      $scope.people = [];

      $scope.$watch('people', function () {
        $scope.person1 = ($scope.people[0] ? $scope.people
          $scope.person2 = ($scope.people[1] ? $scope.people
      })
    }
  ]);
```

```
<div ng-app="Example">
```
