Just a week or two back I was bemoaning the fact that Google's Chrome browser clashed with my shiny black Zune desktop theme, and now I can fix that too:

<http://www.itsalee.com/download-google-chrome-themes-skins-fre>

Has several skins and instructions on their installation. Look at the links off that post too, as there are 4 or more posts with skins. Right now I'm rocking a nice dark grey theme that looks just pretty with Zune.
